BILL JUSTIFICATION:

Bill Justification for BY Electronics Invoice No. 4536

This bill from BY Electronics dated May 29, 2024, is for a total of ₹4,120.56 and for electronic components, used for a robotics or engineering project, that is goat disease prediction and forewarning.

Breakdown of Charges:

- Products: The invoice details various electronic components like sensors, microcontrollers, soldering equipment, and other items. Quantities and individual prices are listed.
- Taxes: GST (Goods and Services Tax) is applied at 18%, split into SGST (State GST) and CGST (Central GST), amounting to ₹314.28 each.

This is another bill justification for BY Electronics Invoice No. 4551, dated July 10, 2024. Here's a breakdown:

Bill To: Biancaa.R, SSN College of Engineering

Total Amount: ₹7,858.80

Items:

- **Raspberry Pi 4 4GB Ram:** This is a single-board computer commonly used for various electronic projects, including robotics, automation, and machine learning. (Quantity: 1, Price: ₹5,850.00)
- **ESP 32 Module:** This is a Wi-Fi microcontroller often used for internet-connected projects and building Internet of Things (IoT) devices. (Quantity: 1, Price: ₹490.00)
- **NodeMCU ESP8266 CP2102:** Another Wi-Fi microcontroller, similar to the ESP 32 but potentially with different features. (Quantity: 1, Price: ₹320.00)

Taxes:

- GST (Goods and Services Tax) is applied at 18%, split into SGST (State GST) and CGST (Central GST), amounting to ₹599.40 each.
